

LIGHT THE NIGHT

with Standard
and Decorative
LED Fixtures

TECHNICALLY ADVANCED LIGHTING SOLUTIONS WITH TIMELESS VALUES

Much of the charm of the South is found in its blend of classic architecture with a sense of security in neighborhood after neighborhood, city after city.

- Quiet neighborhoods where kids play outside after dark.
- A bustling business where workers stay late to wrap up last-minute details.
- Parking lots where shoppers leave belongings in cars.

Whether you're looking for the perfect luminaire to illuminate a walkway, searching for a lighting solution for an entire neighborhood, or even a sophisticated solution for a parking lot, when night falls, you depend on the safety, convenience and charm of outdoor lighting from Santee Cooper.

SAFETY, SECURITY AND CONVENIENCE

Our lighting solutions can be tailored to meet your individual needs. To choose the right light for your needs, consult the chart on the inside. All fixtures listed are LEDs that provide white light at a color temperature of 4000K. Higher wattage fixtures provide brighter light. Santee Cooper will install applicable brackets or poles complete with a photoelectrically-controlled fixture.

RESIDENTIAL AND BUSINESS LIGHTING

Santee Cooper's outdoor lighting offers a number of fixture styles for both residential and commercial lighting. Simply select the style and wattage best suited for your needs, and leave everything else to us!

Santee Cooper also offers a free evaluation for residential developments, individual homes and businesses to help you decide which outdoor lighting fixture and illumination is best and where it should be placed on your property.

A SECURE FEELING IS JUST OUR STYLE

With the security of outdoor lighting as a given, choosing the right style for your project may be the hardest decision. Santee Cooper offers a number of lighting choices in our Standard Lighting and our classically designed Heritage Collection.

THE HERITAGE COLLECTION

The charm and sophistication of this technically-advanced lighting solution makes the Heritage Collection a popular choice for smaller areas which need to be illuminated.

The Heritage Collection's wide selection of luminaires and poles allows this distinctive collection to complement any development's master plan.
