**Subject:** RE: WGS - Annual Impoundment Inspections - Follow-Up

Jeremy/Solomon,  
Per our follow-up inspection performed at 12:45pm on 2/18/25, I concur that all of the action items listed in the "Summary of Recommendations" section of the attached two (2) inspection reports have been performed except for the brush cutting on the entire Slurry Pond 3 & 4 east, north and west slopes, as well as the west slope of Ash Pond B, which was in progress during our inspection.

Thanks,  
Will
